My Dental Receptionist

You care for patients. We help organise enquiries, appointments and your clinic’s digital presence.

1,000 ₪

per month · 100 incoming call minutes included

After 100 minutes: ILS 18 per actual call-hour, equivalent to ILS 0.30/min. Prices exclude VAT; VAT is added where applicable.

Launch, the agreed website, basic CRM setup and map profiles are included without a separate setup fee. Scope and delivery dates are agreed in writing before work starts.

Included in the subscription

Enquiry handling

Configure a voice AI receptionist for incoming calls using clinic-approved opening hours, location, services, pricing and appointment procedures. Complex requests are handed to your team.

CRM or calendar

Set up Galany CRM and an agreed scheduling workflow. A supported connection can add appointments to your calendar. Permissions, available slots, confirmation and duplicate prevention are tested before launch.

Clinic website

Build a website with your services, business contacts and a clear way to enquire. You approve the information and assets; the agreed website scope is included.

Google Maps and Yandex Maps

Create or update profiles with business name, location, hours, contacts, services and website. Avoid duplicate listings; verification requires owner participation and platform approval.

Administrative service, not medical advice.

Included in the subscription

One content set each week

Develop one shared topic, adapt it for Instagram, Facebook, LinkedIn and X, and create one short YouTube video. Publish after content approval and authorised account access. Your clinic reviews medical claims before publication.

SEO and AI-search discoverability

Improve site structure, metadata, clear service descriptions, FAQs and consistent business information. Help search and AI services find and understand your pages; indexing and ChatGPT/Gemini recommendations are not guaranteed.

Responsible review management

Monitor available reviews, prepare replies and help request genuine feedback from real patients without incentives or selecting only happy patients. Public replies do not disclose patient information or confirm that a person received treatment.

Clear monthly pricing

Example: 160 call minutes in a month = 1,000 + (160 − 100) × 0.30 = ILS 1,018 before applicable VAT and agreed external costs.

Domain, hosting, ad spend, paid telephony and third-party subscriptions, where needed, are agreed and paid separately. Paid advertising is not included in the subscription. Work beyond the agreed scope requires approval of a separate quote.

Controlled launch and privacy

Customer telephony is at pilot stage: connect a number and test language, routing and human handoff. CRM and calendar access are not automatic. Before processing patient information, agree permissions, data minimisation, notices and retention. The assistant does not diagnose, recommend treatment or replace emergency care. Medical questions go to the clinic.

The aim is fewer interruptions and more organised enquiry handling. We do not promise zero missed calls, a guaranteed number of patients, higher ratings or search positions.
